

# What's the difference?

CTPharma offers a variety of methods for patients to medicate. Here is an explanation of our products and how to use them.

*Disclaimer: Product packaging subject to change. Not all products represented.*

## CONCENTRATES & LIVE CONCENTRATES

**CS** is a marijuana concentrate with a glass-like form.  
*Instructions: Can be vaporized or combined with flower.*  
*Strength: High*

**CH** is a marijuana concentrate consisting of dry-sift trichomes heated and pressed into a brick-like form.  
*Instructions: Can be vaporized or combined with flower.*  
*Strength: High*

**CK** is a marijuana concentrate made of dry-sift trichomes.  
*Instructions: Can be vaporized or combined with flower.*  
*Strength: High*

**TS** is a crystalline marijuana concentrate with high levels of terpenes.  
*Instructions: Can be vaporized or combined with flower.*  
*Strength: High*

**CR** is a marijuana concentrate with a soft, crumbly texture.  
*Instructions: Can be vaporized or combined with flower.*  
*Strength: High*

**BD** is a marijuana concentrate with a soft, buttery texture.  
*Instructions: Can be vaporized or combined with flower.*  
*Strength: High*

**BA** is a marijuana concentrate with a soft, batter-like texture.  
*Instructions: Can be vaporized or combined with flower.*  
*Strength: High*

**IWH** is a solventless concentrate powder comprised of ice-filtered trichomes.  
*Instructions: Can be vaporized or combined with flower.*  
*Strength: High*

**BH** is a solventless concentrate comprised of trichomes from fresh, frozen flower. Using ice water, agitation and a sieve, the product is cold filtered to create a pure powder that is pressed into a hash concentrate.  
*Instructions: Can be vaporized or combined with flower.*  
*Strength: High*

**RO** is a solventless concentrate made by extracting BH through a rosin press to yield our most premium concentrate.  
*Instructions: Can be vaporized or combined with flower.*  
*Strength: High*

**RE** is made from fresh, frozen flower to extract the full live terpene profile.  
*Instructions: For vaporizing use only.*  
*Strength: High*
